DELIVERY

Dawson Geophysical Company

SEISMIC ACQUISITION

SEISMIC ACQUISITION Over the last half-century, Dawson has built itself into the nation's leading land seismic acquisition company. We have the crews, technology and expertise to acquire surveys in any region you intend to explore or exploit. The right data, delivered as promised, so you can make your drilling decisions with utmost confidence. This is Dawson.

COMMITMENT

Broad capability, deep understanding.

Dawson's land seismic acquisition crews are ready to go anywhere, from coast to coast. Geophysicists are involved with each survey design to ensure that the seismic acquisition parameters are optimized with regard to data quality and cost. The parameters are continually monitored so that the project objectives are met. Our teams understand the local geology and have extensive experience working in the nation's E&P regions, so you can be assured the survey delivered is ready for processing.

Partnering with our clients.

Dedication and commitment to our clients' success is apparent in everything we do, from logistics planning to landowner relations to safety assurance. Attention to every detail in a spirit of open client collaboration is how we've built our reputation. Partnering with our clients has contributed to the continual exploration & production success of the companies that trust their surveys to us. Together, as a team, we get the job done right.

Experienced in the Lower 48

Dawson has far-reaching experience acquiring data in every major exploration region in the continental United States.

More than five decades of keeping our word.

Through industry highs and lows, Dawson has been here, delivering for its clients. We have the financial strength to invest in technological advances and talented people. The long-standing tenure of senior management guides our commitment to delivering accurate seismic data to clients in their quest for oil and natural gas.

- More than 55 years of experience in land seismic acquisition
- Project design, permitting, surveying and data processing
- Pro-Max[®] processing software for full startup analysis
- Seismic crews utilizing the latest acquisition technology with high channel counts
- Full range of capabilities, including vibroseis and dynamite recording plus helicopter support
- 2D, 3D and 4D expertise
- Ability to simultaneously source vibroseis units to increase production efficiency and/or spatial resolution
- Leader in multi-component land acquisition technology
- Highly regarded HSE record that meets industry standards with continual efforts for HSE improvement
- Commitment to environmental issues and treating the owner's land with tremendous care and sensitivity

Geophysical expertise and seismic data delivery. Contact Dawson and this will be your experience. You have our word.
